

One-stop EV charging solutions

Be prepared for the EV era with us

ACSL commits to deliver solutions for a future of smarter and greener mobility. ACSL offers comprehensive Electric Vehicle (EV) charging solutions to your specific needs, from conceptualization to ongoing support. We help you to build a charging system that ensure efficient management and a stress-free charging experience for EV drivers.

24/7
service support

We work with various brands of EV chargers to meet needs of both domestic and commercial purpose.

Stand-alone type charger

Best suited for residential and small facilities to provide free charging service to their users with just one or two chargers.

Network type charger

Connect multiple chargers to EV charging management system and perform extra functions, e.g. central monitoring and management.

EV Charging Management System

Incorporated powerful control, monitoring and analysis features in a user-friendly interface, facilitates efficient management of multiple chargers.

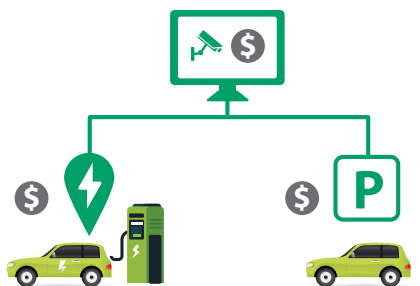

Simple interface for easy operation

Intuitive interface shows charger status, station availability and more in real time. By incorporating the system into our Smartcode Car Park Management System, you can master your car park operations in single interface.

Open platform maximizes integration flexibility

The open platform supports seamless integration with different brands of EV chargers – enables you to enjoy the efficient EV charging management experience right away.

Flexible and smart payment

You have the options to collect EV charging fee separately at the EV payment kiosk or together with the parking fee at the exit pay station. In addition, you can monitor and manage the occupancy of EV parking lots in a smarter way by integrating with license plate recognition system.

Reports enhance smarter decision making

Comprehensive yet easy-to-understand report templates are available in CSV and PDF formats at your fingertips. From energy usage to billing reports, present to you useful data you need to make informed decision of your charging stations.
